❖ PROJECT (ON COLLEGE)

- **IBM – Naan Mudhalvan Project (Reducing the Environmental Footprint of Food: A Comprehensive Management system)**

Led a project focused on reducing the environmental footprint of food production and consumption through sustainable practices and innovative solutions. Conducted in-depth research to analyze the carbon emissions, water usage, and waste associated with various food supply chains. Developed strategies to minimize resource consumption, including the implementation of eco-friendly farming techniques, reducing food waste, and promoting plant-based alternatives. Collaborated with cross-functional teams to optimize processes, increase efficiency, and educate stakeholders on sustainable food sourcing and consumption. The project contributed to measurable reductions in carbon footprint and resource waste within the organization.

- **Mini project about Transport Management System**

In my Transport Management Project, I optimized fleet operations by implementing GPS tracking and telematics, which improved visibility and accountability across all assets. Additionally, I focused on cost-control measures, achieving significant reductions in transportation expenses through resource optimization.

- **Final Year Project About Malware Detection and Analysis**

Conducted in-depth malware analysis to identify, classify, and neutralize malicious threats. Developed and implemented proactive malware detection strategies to prevent security breaches. Led advanced threat hunting initiatives to detect and respond to zero-day malware attacks. Collaborated with incident response teams to analyze malware behavior and contain outbreaks. Developed custom scripts to automate malware detection and response workflows.
